

# TBILISI 13<sup>th</sup> INTERNATIONAL DENTAL CONGRESS

Scientific Research Center RADIX

17, 18, 19<sup>th</sup> May | **2024**

This year, at the 13th International Dental Congress in Tbilisi, the future format of dental conferences, which will be held by the scientific network "Radix", will be offered.

## 17<sup>TH</sup> OF MAY PROGRAM

**09:30–10:30** Registration

**10:30–11:00** Opening Ceremony

**11:00–12:30** Gums & Beyond: Exploring the Frontiers of Periodontics –  
Supervisor of the session Landa Lursmanashvili

During the last 10 years, the field of periodontology in Georgia has developed at a fairly fast pace. Access to information and the integration of modern guidelines into our practice have changed the way we diagnose, plan treatment, and proceed procedure. Speakers presented in the section will talk about important issues of clinical case management.

**12:30–13:30** Navigating the Future: Digitalization in Dental Practice  
Management – Supervisor of the session Mari Mchedlishvili

Digitization of medicine is an irreversible process. In the face of increasing regulatory trends, streamlining and reducing routine administrative activities is a concern of all clinicians. The section will present companies on the Georgian market that can provide this service to dental clinics.

**13:00–14:00** Lunch

**14:00–16:00** Community and Oral Health: Exploring Public Health  
Dentistry – Supervisor of the session Zurab Alkhanishvili

The pandemic has exposed the information vacuum between scientific achievements and ordinary citizens. The section will discuss public health interventions that affect dental practice, dental regulations that are part of the activities of clinics, scientific findings that should be part of the awareness of dentists as representatives of medical science.

## 18<sup>TH</sup> OF MAY PROGRAM

### **11:00–13:00** The Art and Science of Endodontics: A Deep Dive into ENDO – Supervisor of the session Sophio Samkharadze

In the section, difficulties in endodontic practice, common mistakes and their management will be discussed. What does today's industry offer the practicing physician?!

### **13:15–14:15** Regulations imposed by the state, existing experience and recommendations – section leader Ketevan Gogilashvili

### **14:15–15:15** Leadership and Strategy: Advanced Management Techniques in Dentistry – Supervisor of the session Mariam Kurtsikidze

Human resources management, infection prevention and control, labor safety, medical waste management, quality control, immunization, screening, international management standards, financial requirements, radiation safety - this is an endless list of non-dental areas that every clinic has to focus on or will have to in the future. Companies offering this clinic service will be presented at the session.

### **15:15–16:15** Lunch

### **16:15–17:15** Comprehensive treatment planning of complex clinical cases with a multidisciplinary approach – Leonid Emdim

### **17:15–18:15** Crafting Smiles: The Cutting-Edge of Prosthetic Dentistry – Supervisor of the session Nino Gvasalia

The clinical results of Georgian specialists are not inferior to the achievements of their foreign colleagues, although the management, treatment and planning of complex patients is still a challenge. What data collection is necessary for a complete anamnesis, what is the role of the technical laboratory, orthodontist or orthopedic dentist, what kind of communication problems can we encounter and how does all this affect the final result?!

## 19<sup>TH</sup> OF MAY

### PRACTICAL COURSES

Obtaining diagnostic data for the treatment and rehabilitation of the maxillo-dental system and temporomandibular joint using digital technologies.

***Leonid Emdim***

How to shape severely curved root canal system in a safe and predictable way using ENDOSTAR E3 AZURE.

***Marc Kaloustian***
